There is no place where that is more beautifully illustrated than in the administration of tuberculin, because with tuberculin you can give one patient a thousand times the dose you give another, and the large dose will be too small and the small dose too large to produce the best opsonic resistance to the tuberculosis. These are the basic questions that we are endeavoring to work out in connection with the metastatic infections of the joint, and as our cases are mostly advance ones, they are difficult problems, but we are confident some one will soon take up the new treatment with a large clinical material and more rapid results will obtain. THE BLOOD-SUPPLY IN AND AROUND THE JOINTS The accompanying series of skiagrams, showing...
