Reviews

Definitely among the best book I have possibly read. I have study and i am sure that i will going to go through once more once more later on. Your lifestyle span is going to be convert when you full looking at this publication.

(Prof. Damon Kautzer III)

PROCEEDINGS OF THE 5TH INTERNATIONAL CONFERENCE: TRANSILVANIA UNIVERSITY OF BRASOV 16 - 17 OCTOBER 2014, BRASOV, ROMANIA

Derc Publishing House, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.After receiving many favorable comments and having interesting discussions regarding the Proceedings of the 4th International Conference Advanced Composite Materials Engineering COMAT 2012, and the Proceedings of the 5th International Conference Computational Mechanics and Virtual Engineering COMEC 2013, we are pleased to present these Proceedings of the 5th International Conference Advanced Composite Materials Engineering and the 3rd International Conference Research Innovation in Engineering COMAT 2014. This conference was organized with the important support of Transilvania University of Brasov, Romanian Academy of Technical Sciences and Romanian Society of Theoretical and Applied Mechanics, to whom we thank very much. This conference was dedicated to Professor Ioan Goia, at his 80th birthday, because he was a great Professor at Transilvania University of Brasov for many years, and he supported these conferences from the very beginning. He is an extraordinary Professor, who had astonishing accomplishments, kindness, patience, dedication and optimism. Professor Ioan Goia is a great example for the younger generations, and he is always remembered for his great devotion to teaching and helping students. The research and innovation in engineering in general, and in particular advanced composite materials engineering, are ever more important in everyday activities, and they include, between many other techniques, geometric models, analysis, simulation, optimization and decision making tools, within a computer-generated environment, that accelerates product development, which is the main purpose of any engineering effort. The applications are very diverse and include manufacturing, aerospace, civil engineering structures, communication, geotechnics, flow problems, automotive engineering, predictive surgery, transportation, geo-environmental modeling, biomechanics, electromagnetism, medicine, prediction of natural physical events, and metal forming, just to mention a few. These Proceedings of COMAT 2014 include 50 papers, which analyze many...
