Excerpt: . . . 9 At the same time that production was declining, the demand for Helium-3 has been increasing since 9 - 11. Helium-3 has been a critical component in the portal radiation monitor programs at DHS and approximately 60, 000 liters have been used in the current PVT systems alone. The ASP systems that Raytheon designed would have required, if a full acquisition had gone forward, approximately 200, 000 liters of helium-3. The Department of Energy has its own radiation detection program in mega-ports with additional liters of helium-3 used in that program. Handheld and backpack radiation detection systems at DHS, DOE and also DOD are another ongo-ing source of expanded demand since 9 - 11. In addition to this new security-related source of demand, the Spallation Neutron Source project, also a DOE program was moving towards conclusion, with its main detector requiring an additional 17, 000 liters. With countries around the world all pushing...
