Tambelo (or Tambelan) Island of the Malay Archipelago affords a striking instance of such artificial extraction. In this island principality a distinct strain of Caucasian blood was discovered in the natives, some of whom were nearly pure white. Recent discoveries show this anomaly to be explained by the early establishment here of a pirate colony preying on the commerce of the British and Dutch East India Companies before effective protection could be afforded these projects by the home governments. The peculiar position of Tambelo Island in the China Sea, at once isolated and hazardous of approach by virtue of encircling coral reefs, yet within striking distance of French Indo-China, British India, and the Straits Settlements and accessible to the mariner versed in its secret channels, readily corroborates this hypothesis.
